ABOUT UNITED ACCREDITATION FOUNDATION — UAF

UAF is a not-for-profit organization. It operates in accordance with relevant international standards and requirements and maintains integrity and impartiality while taking into account national and public interest. UAF has established an independent, impartial, and transparent accreditation system. As a not-for-profit accreditation body, decisions made by UAF are not subject to any commercial or financial obligations.

UAF is internationally recognized by having a signatory status across multilateral recognition arrangement of International Accreditation Forum (IAF) and mutual recognition arrangements of Asia Pacific Accreditation Cooperation (APAC).

UAF represents the interests of the stakeholders at international forums through membership and active participation with simultaneously ensuring measures to safeguard impartiality and objectivity of its accreditation process.

UAF' International Credentials

United Accreditation Foundation (UAF) provides accreditation to certification bodies for various management system schemes as per ISO/IEC 17021 as well as Human health care management system scheme and Association of Health Providers (AHPI) Scheme- Green and Clean hospital management system scheme (GCHMS-Part I) for Hospitals and Green and Clean hospitality management system scheme (GCHMS-Part II) for safe and Healthy workplaces, Personnel certification bodies as per ISO/IEC 17024, Testing and Calibration Laboratories as per ISO/IEC 17025, Inspection bodies as per ISO/IEC 17020 based on an assessment of their competence as per its criteria and in accordance with UAF and international standards and guidelines. The UAF schemes of accreditations for Medical imaging centers as per ISO 15189 and Certification bodies as per ISO/IEC 17065 are under revision and will be available for accreditation in the near future.

ABOUT INTERNATIONAL ACCREDITATION FORUM — IAF

The International Accreditation Forum (IAF) is a global association of accreditation bodies and other organizations involved in conformity assessment activities. Its primary goal is to facilitate international trade and promote the recognition of accredited certifications. The IAF establishes and maintains guidelines and standards for accreditation bodies, ensuring that they operate according to internationally recognized practices. It promotes mutual recognition agreements among accreditation bodies to enhance the acceptance of accredited conformity assessment results across national borders. The IAF also provides a platform for information sharing, cooperation, and collaboration among its members, fostering continuous improvement in the field of conformity assessment. By ensuring consistency and credibility in accreditation practices, the IAF plays a crucial role in building trust and confidence in products, services, and management systems worldwide.

OUR SERVICES

ISO 9001

ISO 9001 is the world's most recognised Quality Management System (QMS) standard. Its aim is to help organisations meet the needs of their customers and other stakeholders more effectively. This is achieved by building a framework to ensure consistent quality in the provision of goods and/or services.

- ◆ The connection of quality management systems to organizational processes
- ◆ The encouragement of natural progression towards improved organizational performance.
- ◆ Requirements for the establishment of measurable objectives at relevant functions and levels.
- ◆ Being Oriented toward 'continual improvement' and 'customer satisfaction' including the monitoring of information on 'customer satisfaction' as a measure of system performance.

ISO 14001

ISO 14001:2015 specifies the requirements for an environmental management system that an organization can use to enhance its environmental performance. ISO 14001:2015 is intended for use by an organization seeking to manage its environmental responsibilities in a systematic manner that contributes to the environmental pillar of sustainability. An Environmental Management System helps your organization to be in control of and successfully manage the most significant environmental aspects, e.g. emissions, waste-handling utilize natural resources, and energy-efficiency.

- ◆ Reduced energy consumption due to conservation
- ◆ Reduced taxes by using renewable energy
- ◆ Reduced cases of polluting spills
- ◆ enhancement of environmental performance

OCCUPATIONAL

ISO 45001 (Occupational Health and Safety Management System)

What are the benefits of having an OH&S management system?

When you need to convince management, it is often helpful to talk in dollars and cents, but this can be difficult when justifying the implementation of a management system. So, you will instead need to focus on the benefits that a management system can deliver, and why they apply to your company. Here are a few to think about:

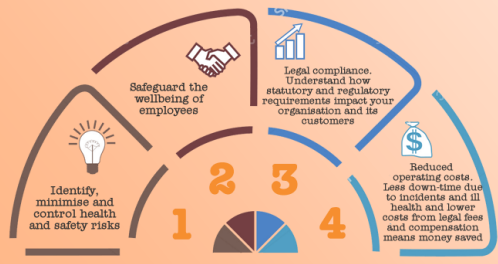

Help maintain compliance with legal requirements. It goes without saying that you will meet all of the legal requirements that you know about for occupational health & safety, but are you sure that you have identified everything? One of the most important benefits that can be derived from implementing an OH&S management system according to the ISO 45001 requirements is to provide you with a framework for identifying, monitoring, and complying with all the varied legal, regulatory, and contractual requirements that apply to your company processes. The system is there to aid in maintaining your compliance, which can not only help prevent employee injury, but also prevent costly fines for non-compliance.

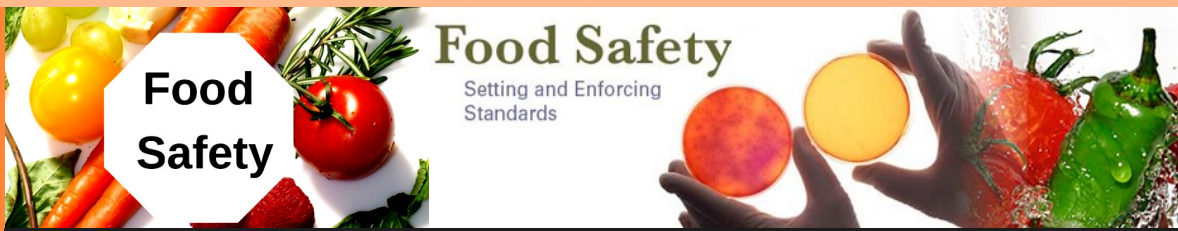

Improve your company credibility and image. While your contracts may not include a requirement for an OH&S management system, many customers are relieved to know that a supplier has good control over the health & safety of their workplace. For a customer, this can mean that they have a much lower risk of delays in receiving hardware due to accidents and injuries, which can stop production as much as they hurt workers. In fact, in some jurisdictions legal fines can be reduced if the company is found to have a functioning OH&S management system, because this shows concern for prevention of injuries and legal non-compliance.

Reduce employee turnover. If you are known as an employer who cares about safe working environments, your employees will want to stay. And, they will not only benefit from this environment of safety, but also help to improve the safety of the working environment. Because well-trained employees are your greatest asset, this can be a great cost savings. After all, it is less expensive to retain employees than it is to hire and train new employees.

Process improvement. Continual improvement is an integral part of ISO 45001, and this can be used to help your organization make improvements and enhancements in your organizational processes. By involving your people in process improvements, you can find savings not only in health & safety, but also in the time and resources needed to do the work.

ISO 22000 (Food Safety Management System)

What is ISO 22000?

ISO 22000 is a globally accepted international standard, which specifies the requirements for food safety management systems. Established in 2005, ISO 22000 is applicable to all organizations involved in the food chain, whose main objective is to ensure food safety. The standard outlines a framework which harmonizes all parts of the food supply chain, from producer to consumer, and helps you reduce food hazards, control the risks and prevent contamination.

Why is Food Safety Management important for you? Food Safety Management has become the headline of many articles worldwide and if businesses choose to ignore it, they will have you bear the consequences. By obtaining an ISO 22000 certification, you will prove your commitment to food safety and adherence to respective food safety regulations.

By obtaining an ISO 22000 certification, you will prove your dedication to food safety to your customers and stakeholders. Moreover, you will gain a worldwide recognized certification on Food Safety Management, where you will learn all the processes and policies needed to mitigate risks and enhance accountability and transparency. This will, in turn, will you a competitive advantage by improving your brand's reputation and leading to potential increases in business volume.

Benefits of ISO 22000 Food Safety Management

By becoming ISO 22000 certified you will be able to:

- Enhanced utilization of resources in the world level
- Improved profits in companies
- Greater quality jobs in the food industry
- Improved economic growth
- Safer food insurance
- Reduced rates in food borne disease
- Effective documentation of techniques, procedures and methods
- A potential harmonization of national food standards is provided
- This is an effective international standard
- For regulators, it is the most appropriate system

FOOD SAFETY

ISO: A BRIEF INTRODUCTION

ISO is a network of the national standards institutes of 157 countries on the basis of one member per country, with a central secretariat in Geneva, Switzerland that co-ordinates the system. ISO is a non-governmental organization: its members are not, as is the case in the United Nations System, Delegation of national Governments. Nevertheless, ISO occupies a special position between the public and private sectors. This is because, on the one hand structure of their countries are mandated by their government. On the other hand, other members have their roots uniquely in the private sector, having been setup by national partnership of industry associations. Therefore, ISO is able to act as a bridging organizations in which a consensus can be reached on solutions that meet both the requirements of business and the broader needs of society, such as the needs of stakeholder groups like consumers and users.

BENEFITS OF GETTING ISO CERTIFIED

- ◆ **Increased Efficiency:** The companies have done extensive researches on the processes they are following, how to maximize quality and efficiency before going through the ISO 9000 series Quality Management Standards certification process. Once they achieve certification, the processes are established. There are guidelines which can be easily followed by anyone, making it easy to provide training, transitions and even for troubleshooting purpose.
- ◆ **Increased Revenue:** It has been observed that ISO QMS certified companies have shown improvements in the field of productivity, financial performance as compared to the uncertified ones.
- ◆ **Employee Morale:** The staff is more satisfied and motivated once there are defined roles and responsibilities, accountability of management, established training procedure and a well-defined picture of how the roles of the employees affect quality and overall success of the company.
- ◆ **International Recognition:** The International Organization for Standardization (ISO) is recognized worldwide as the authority on quality management.
- ◆ **Factual Approach to Decision Making:** The ISO 9000 QMS standard sets out clear instructions regarding audits and process reviews. This helps in information gathering and decision making based on data.
- ◆ **Supplier Relationships:** ISO certification has been found beneficial regarding supplier relationships. The documentation and testing procedures help to ensure the quality of the raw materials used for production purpose. This also helps in properly evaluating a new supplier before changing suppliers. There is a procedure to check consistency with respect to how and where orders are placed.
- ◆ **Consistency:** Since all processes are documented, there is a minimum scope of errors. Processes starting right from research and development, covering production, shipping is well documented. Even any small change in the process has to be documented ensuring that the changes are well planned and implemented in the best possible way to ensure maximum efficiency.
- ◆ **Customer Satisfaction:** Companies can gain the confidence of clients easily because the ISO is a universally accepted standard. ISO9001 QMS certification ensures efficiency, consistency and dedicated quality service by the companies thereby ensuring the satisfaction of the customers.
- ◆ **Improvement Processes:** The ISO 9000 QMS emphasizes on audit processes, management review and improved processes based on collected data. Based on facts and using a system of documentation and analysis, improvements are carefully planned and implemented. This ensures that the best decisions are made for your company.
